Magic Leap is the latest tech company to launch an augmented reality device to make this world possible with its \$2,295 headset. There's also the \$3,000 Microsoft HoloLens. And, as you would expect ...

Holograms in your face: Is Magic Leap our future? - CNET

Augmented reality (AR) is the real-time use of information in the form of text, graphics, audio and other virtual enhancements integrated with real-world objects. It is this 'real world' element that differentiates AR from virtual reality. AR integrates and adds value to the user's interaction with the real world, versus a simulation.

Augmented Reality - AR - Gartner's Tech Definition

Augmented reality solutions are poised for rapid growth, empowered by the IoT, digital business and next-gen smartphones. Strategic planners at device providers and application developers need to be careful with partnerships as the market consolidates around platforms.
