(PDF) Experimental Research Methods

Experimental research designs are the primary approach used to investigate causal (cause/effect) relationships and to study the relationship between one variable and another. This is a traditional type of research that is quantitative in nature. In short, researchers use experimental research to compare two or more groups on one or more measures.

Overview of Experimental Research - Center for Innovation

The following module discusses the types of experimental research and focuses on the types of research designs commonly used in true experimental research. Learning Objectives: List the three broad categories of experimental research. Describe the different kinds of true experimental research design.

Types of Experimental Research Designs - Center for

Design Experimental study. Setting Sleep laboratory in Stockholm, Sweden. Participants 23 healthy, sleep

deprived adults (age 18-31) who were photographed and 65 untrained observers (age 18-61) who rated the photographs.
